

SFI Has Changed the Way Driver Restraints and Window/Roll Cage Nets are Dated for SFI Specs 16.1, 16.2, 16.5, 16.6, 27.1, and 37.1

SFI Labels Prior to 2017

SFI Labels Available Jan. 1, 2017

- The New SFI Label Design (above right) removes the month/year date of manufacture and incorporates a single expiration date. This eliminates punch-dating and facilitates technical inspection in the field.
- New Labels will start being used January 1, 2017.
- New Labels will come out in 6-month segments per the below chart. Certified Driver Restraints and Window/Roll Cage Nets may still be used for 2 years, service life has not changed.

Date Indicated on Label	Manufactured During This Period (mm/dd/yy)	Expiration
JUN 2019	01/01/17 – 06/30/17	Jun. 30, 2019
DEC 2019	07/01/17 – 12/31/17	Dec. 31, 2019
JUN 2020	01/01/18 – 06/30/18	Jun. 30, 2020
DEC 2020	07/01/18 – 12/31/18	Dec. 31, 2020

- Manufacturers are allowed to use the discontinued punch-date labels (above left) until their existing supply is gone, so you may see the old style labels on Driver Restraints and Window/Roll Cage Nets for a while. Restraints or Nets with the old label can still be used until they expire, which is 2 years from the date of manufacture punched on the tag.
